PROJECTS

CHATLIFY-CHATAPP

[Live](#) [GitHub](#)

- Developed a full-stack real-time chat application using MERN stack (MongoDB, Express.js, React.js, Node.js)
- Implemented secure authentication system using JWT (Login/Signup functionality)
- Integrated Socket.IO for real-time messaging and instant user communication
- Implemented Redux Toolkit for efficient global state management
- Added user search functionality for quick user discovery
- Designed a responsive and modern UI using Tailwind CSS
- Enhanced UI with React Icons for better user experience

FOODIEFRENZY – FOOD ORDERING WEBSITE

[Live](#) [GitHub](#)

- Developed a dynamic and responsive food ordering website (FoodieFrenzy) using ReactJS
- Utilized Redux Toolkit for efficient and scalable state management across the application
- Implemented a search and filter feature to allow users to find food items by category
- Designed a modern and responsive UI using Tailwind CSS for better user experience
- Technologies used: ReactJS, Redux Toolkit, Tailwind CSS

ECOMMERCE WEBSITE

[GitHub](#)

- Developed a full-stack E-commerce web application using the MERN stack (MongoDB, Express.js, React.js, Node.js)
- Implemented Redux Toolkit for efficient global state management across the application
- Designed a responsive and modern UI using Tailwind CSS for enhanced user experience
- Integrated Cloudinary for secure image upload and product image management
- Used React Icons to improve UI aesthetics and user interaction
- Stored and managed all application data in MongoDB Atlas (cloud database)
- Built an Admin panel to add, update, and delete products dynamically
- Implemented user authentication system allowing login, logout, and secure access control
- Enabled users to view products, filter by category, and add items to cart after login
- Added cart functionality for managing selected products before purchase
